Data Dictionary

In this data dictionary, you will find a list of every tab, column, and possible participant coded answer that can be found in the SCORE Data excel sheet.

CoB-Cleaned up	Indicates data for between subject participants used in our analysis (after applying exclusion criteria) in the Conflicting self-expression condition and Bimodal Rating distribution condition.
All CoB data	Indicates data for between subject participants before data cleaning and implementing exclusion criteria in the Conflicting self-expression condition and Bimodal Rating distribution condition.
CoU- Cleaned up	Indicates data for between subject participants used in our analysis (after applying exclusion criteria) in the Conflicting self-expression condition and Unimodal Rating distribution condition.
All CoU data	Indicates data for between subject participants before data cleaning and implementing exclusion criteria in the Conflicting self-expression condition and Unimodal Rating distribution condition.
ClB- Cleaned Up	Indicates data for between subject participants used in our analysis (after applying exclusion criteria) in the Clear self-expression condition and Bimodal Rating distribution condition.
All ClB data	Indicates data for between subject participants before data cleaning and implementing exclusion criteria in the Clear self-expression condition and Bimodal Rating distribution condition.
ClU- Cleaned Up	Indicates data for between subject participants used in our analysis (after applying exclusion criteria) in the Clear self-expression condition and Unimodal Rating distribution condition.
All ClU data	Indicates data for between subject participants before data cleaning and implementing exclusion criteria in the Clear self-expression condition and Unimodal Rating distribution condition.
Deleted data	Indicates data that was excluded in our analysis do not meet the pre-registered exclusion criteria. These data are separated by condition and by using the column type to signify which condition they belong to.
ALL DATA	Indicates all data collected for every condition. These data are separated by condition and by using the column type to signify which condition they belong to.
All Usable Data	Indicates all data that was deemed usable by our preregistered exclusion criteria for every condition. These data are separated by condition and by using the column type to signify which condition they belong to.
ALL DATA CODED FOR SPSS	Indicated data coded properly to be used in our analysis on the IBM SPSS software.

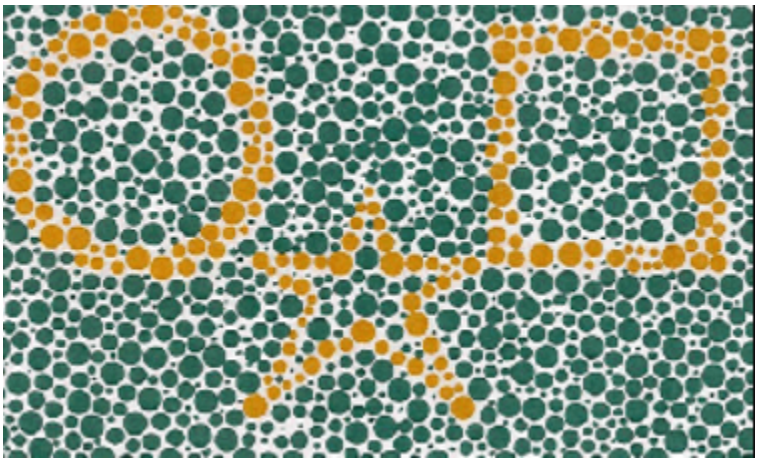
ALL condition tabs previously listed (besides ALL CODED DATA FOR SPSS) have the following data columns.

Type	Indicated the conditions in which the participant was randomly assigned to by the software Formr.
S1_manipulation	Indicates the answer to an attention check asking participants to answer 4 if they were paying attention.
SCL Compliant code	Indicating Savannah C. Lewis coding of open-ending responses. 1 indicated that they were compliant in their condition (Clear or conflicted). 2 indicates that they were not compliant for their condition (Clear or conflicted).
CRC code	Indicating Christopher R. Chartier coding of open-ending responses. 1 indicated that they were compliant in their condition (Clear or conflicted). 2 indicates that they were not compliant for their condition (Clear or conflicted).
S1_cl_reflect	Indicating the participants open ended answer to being asked to recall and immerse yourself in a time when you felt they had a clear and consistent view or don't have a clear and consistent sense of who you really were. Then describe their reflected memory in as much detail as possible.

S1_house

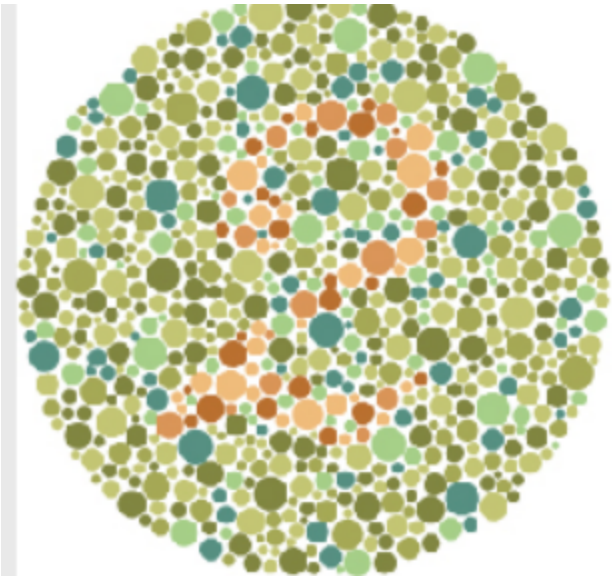
Indicates which colors do you recognize in the image above. Participants were asked to mark all that apply. Potential answers are as follows:
1=Yellow
2=Blue
3=Pink
4=Red
5=Orange

S1_shape



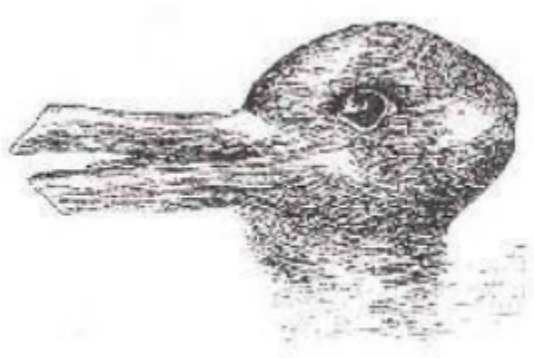
What shapes do you see in this image?

S1_number



Do you see a number in this image?
1=Yes
2=No

S1_bir_rab



What do you see in this image?

S1_scram_1 Participants open ended responses to the set of letters (UEHSO) asked to unscramble.

S1_scram_2 Participants open ended response to the set of letters (FAEC) asked to unscramble.

S1_scram_3 Participants open ended response to the set of letters (OTHPO) asked to unscramble.

S1_scram_4	Participants open ended response to the set of letters (NEPHO) asked to unscramble.
S1_scram_5	Participants open ended response to the set of letters (DRBI) asked to unscramble.
S1_likely	Participants likert scale answer to “how likely they would be to see this movie?” (1= Very Unlikely and 7= Very Likely)
S1_quality	Participant likert scale answer to “How good or bad do you think this movie will be?” (1=Extremely Bad and 7=Extremely Good)
S1_purchase	Participant likert scale answer to “How likely would you be to buy this movie?” (1=Very Unlikely and 7= Very Likely)
S1_price	Participant likert scale answer to “How much would you be willing to pay to purchase this movie” (please enter a dollar amount)?
S1_attention	Participant attentive check requires participants to select 7 as their answer if they are paying attention.
S1_ratings_seen	Coded response to whether participant was able to see the rating distribution picture. 1= Yes, 2= NO
S1_break	Coded response to determine if participants took a break during this task. 1= Yes, 2=No
S1_distraction	Coded response to access participant self-reported distraction level during this task. (1=not distracted at all and 7= Very Distracted)
S1_opinion	Coded response to participants self report opinion on whether researchers should use their date. 1=Yes 2=No
S1_questions	Open ended question for participants to answer if there was anything confusing or unclear about the study or other comments.
S1_purpose	Open ended response to access if participants knew the purpose of the study.
S1_demo_1	Coded response to gender. 1= Female, 2=Male, 3=Other
S1_demo_2	Coded response to Race. 1= White/Caucasian, 2=African American, 3=Hispanic, 4=Asian, 5=Native American, 6=Pacific Islander, 7=Other.

S1_demo_3	Open ended response to current age of participant
S1_demo_4	Coded response to access if participants have completed a similar study. 1=Yes, 2=No.
Blankcount	Indicted the number of missing data for each participant.
Exclusion	Indicates the reason in which they were excluded. ● 0= no exclusion (these were used in analysis) ● 1= Data was excluded for being coded by both Savannah and Christopher as noncompliant for their assigned condition ● 2= Data was excluded as the participants indicated they were not able to see the bimodal or unimodal (depending on condition) picture ● 3= Data was excluded for missing any data points for any possible question ● 4= Data was excluded for being deemed as test units as they were ran before or after data collection had begun/ended.

<u>Column description specific to the tab named "ALL CODED DATA FOR SPSS"</u>

Experimental	Indicates contrasted coded of the rating distribution condition where 1= Bimodal and -1=Unimodal
Clarity	Indicates contrast-coded of the self-expression condition where 1 = clear, and –1 = conflicted)
Interaction	Indicates the Self-concept by Rating Distribution interaction by multiplying the Experimental contrasting code by the Clarity contrasted coding.

S1_likely	Participants likert scale answer to “how likely they would be to see this movie?” (1= Very Unlikely and 7= Very Likely)
S1_quality	Participant likert scale answer to “How good or bad do you think this movie will be?” (1=Extremely Bad and 7=Extremely Good)
S1_purchase	Participant likert scale answer to “How likely would you be to buy this movie?” (1=Very Unlikely and 7= Very Likely)
AVERAGE	Indicates the average of the participants likert scoring on S1_Likely, S1_quailty and S1_purchase.
